2 Learning Objectives for the workshop

At the end of the workshop, participants will have an understanding of:

- ILO1
- ILO2
- ILO3
- ILO4

3 Intended audience

The workshop aims to cater for participants with a range of different backgrounds, who are interested in analysing data with modern spatial and spatio-temporal statistical modelling approaches.

4 Prerequisites

Participants should be familiar with the `R` environment, and general statistical approaches for modelling such as regression, analysis of (co)variance, and generalized linear models.

No knowledge of `R-INLA` or `inlabru` is required.
